

# CHANDAN KUMAR MAURYA

**Software Engineer | Full Stack Developer | MERN Stack | Next.js | TypeScript**

Phone: +91 9125102844 | Email: code.us.cm@gmail.com | LinkedIn: linkedin.com/in/ichanddan | GitHub: github.com/ichanddan | Portfolio: Available on request

---

## PROFESSIONAL SUMMARY

---

Results-driven Software Engineer with 2+ years of experience designing, developing, and deploying scalable web and mobile applications using the MERN stack, TypeScript, Next.js, and React Native. Proven track record of building secure RESTful APIs, optimizing application performance, and delivering responsive, user-centric interfaces in agile, cross-functional teams. Strong foundation in software engineering principles, Git version control, and modern cloud deployment platforms.

## TECHNICAL SKILLS

---

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

**Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, Ant Design, Shadcn UI, Responsive Web Design

**Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Prisma ORM, WebSocket

**Databases:** MongoDB, MySQL, Mongoose, Query Optimization

**Mobile:** React Native, Cross-platform App Development

**DevOps & Tools:** Git, GitHub, Vercel, Netlify, DigitalOcean, Postman, VS Code, Figma, JIRA

**Methodologies:** Agile/Scrum, Code Review, Unit Testing, SDLC, Version Control

## PROFESSIONAL EXPERIENCE

---

**Software Engineer — Aiqwip Technology Pvt. Ltd., Bangalore, India**

*December 2025 – Present*

- Design, develop, and maintain scalable full-stack web applications using Next.js, TypeScript, Node.js, and Express.js, contributing to the company's core product roadmap.
- Build secure RESTful APIs and backend services integrated with MongoDB and MySQL, ensuring high availability, data integrity, and optimal query performance.
- Implement reusable, responsive UI components with Tailwind CSS and Shadcn UI, improving development velocity and maintaining a consistent design system.
- Collaborate with product managers, designers, and QA engineers in an agile environment to deliver features through sprint-based release cycles.
- Participate in code reviews, write unit tests, and apply software engineering best practices to improve code quality and reduce production defects.

**Full Stack Developer — Aasa Technology (Remote)**

*January 2025 – December 2025*

- Designed and implemented secure, scalable RESTful APIs using Node.js and Express.js, enabling seamless frontend-backend communication for 10,000+ active users.
- Developed reusable, performant UI components with React.js and TypeScript, cutting component development time by ~30% and ensuring consistent design system adoption.
- Reduced page load times by ~40% by optimizing rendering, implementing lazy loading, and refactoring critical React components.
- Resolved high-priority production bugs, improving checkout conversion and overall application reliability for thousands of end users.
- Collaborated with product, design, and QA teams in an agile environment to ship features on sprint-based release cycles.

**Full Stack Developer — Daps Software (Remote)**

*May 2024 – January 2025*

- Engineered end-to-end web solutions using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering 5+ production-ready modules on schedule.
- Partnered with cross-functional teams to architect and implement scalable backend services, supporting a 25% increase in platform traffic without degradation.
- Integrated third-party REST APIs and payment/auth services (JWT, OAuth) to expand product capabilities and shorten feature delivery cycles.

- Authored unit and integration tests, enforced ESLint/Prettier standards, and participated in peer code reviews to maintain high code quality.

### **Frontend Developer — Daps Software (Remote)**

February 2024 – May 2024

- Translated Figma wireframes into pixel-perfect, production-grade interfaces using HTML5, CSS3, and JavaScript, improving design-to-development handoff.
- Built fully responsive, cross-browser UIs optimized for mobile, tablet, and desktop, reaching an accessibility score of 90+ on Lighthouse audits.
- Integrated frontend components with backend REST APIs, partnering with server-side engineers to ensure end-to-end functionality and data integrity.

### **KEY PROJECTS**

---

#### **eSportsPedia (Personal Project) — [esportspedia.org](https://esportspedia.org) — Next.js, Server Actions, TypeScript, Tailwind CSS, Shadcn UI, Cloudflare R2**

- Designed and developed a full-stack esports wiki platform covering Indian gaming, featuring player profiles, team pages, tournaments, and news articles.
- Implemented SEO-optimized pages using Next.js Server-Side Rendering (SSR) and Static Site Generation (SSG), improving search discoverability and Core Web Vitals.
- Built server-side data mutations and secure backend logic using Next.js Server Actions, eliminating the need for a separate API layer and simplifying the architecture.
- Integrated Cloudflare R2 object storage and Next.js Image optimization to deliver responsive, fast-loading media assets across devices.

#### **School Spares — JavaScript, Node.js, Express.js, MongoDB, React.js, Ant Design, Redux, Prisma ORM**

- Built a full-stack e-commerce platform with secure JWT authentication, RESTful APIs, and role-based access control for admin and customer workflows.
- Optimized MongoDB queries and server-side logic, reducing average API response time by ~35% and improving overall throughput.
- Designed a responsive, accessible UI with interactive product catalog and real-time cart updates to enhance user engagement.

#### **ShamRock India — JavaScript, Node.js, Express.js, MySQL, React.js, Ant Design, Redux, Prisma ORM, WebSocket**

- Developed a modular, component-based admin dashboard with reusable widgets, drag-and-drop layouts, and configurable views.
- Implemented centralized state management with Redux Toolkit and boosted rendering performance using virtual DOM tuning and lazy loading.
- Enabled real-time notifications and live data streams via WebSocket, improving operational visibility for internal users.

#### **Nutri Value — JavaScript, Node.js, Express.js, MySQL, React Native, Redux, Prisma ORM**

- Delivered a cross-platform nutrition tracking app (iOS, Android, Web) with secure authentication, REST APIs, and offline support.
- Architected a scalable backend with Prisma ORM and MySQL, powering seamless sync between mobile and web clients for a consistent user experience.
- Implemented daily nutrition analytics and goal-tracking features that increased repeat user sessions during internal beta testing.

### **EDUCATION**

---

#### **Master of Computer Applications (MCA) — Manipal University Jaipur (Distance)**

2023 – 2025 | SGPA: 9.57 / 10

#### **Bachelor of Computer Applications (BCA) — Mahatma Gandhi Kashi Vidyapith University**

2018 – 2021 | Percentage: 61%

### **CERTIFICATIONS**

---

- **O Level Certification** — National Institute of Electronics and Information Technology (NIELIT), Grade: A+ (2021 – 2023)
